

PLIER | FRISE

## ○ que é possível fazer com uma chapa metálica?

A partir dessa pergunta, a parceria entre Omega Light e estudiobola se desenvolveu de maneira surpreendente. Do casamento do design com técnica produtiva inovadora, sem perder a vocação metalúrgica, nasce a linha de luminárias decorativas **Plier e Frise**. A releitura do desenho clássico das cúpulas ganha força e caráter expressivo através da aplicação de chapas de alumínio conformadas e somente encaixadas. A base segue a mesma solução com um desenho limpo e leve, compondo belíssimas luminárias.

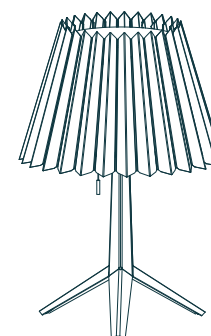

*What can you do with a metal plate? From this question, the partnership between OmegaLight and estudiobola was developed amazingly. From the wedding of a unique design with innovative production technique, was born a line of decorative fixtures called Plier and Frise. The classic design of the domes gains strength and expressive character through the application of aluminum plates bended and fitted only, without any kind of welding. The base follows the same solution with a clean and lightweight design. For use with halogen bulbs or CFL, this fixture provides a soft and pleasant light.*

Linha decorativa **plier**, confeccionada em alumínio, tratado com pintura eletrostática poliéster. Difusor em vidro temperado com acabamento translúcido acidato. Disponível nas versões abajur, coluna e pendente.

*Plier decorative line, made of aluminum, treated with electrostatic polyester paint. Tempered glass diffuser with translucent finish. Available in abatjour, column and pendant versions.*
